

MOL GROUP RESPONSIBLE PROCUREMENT POLICY

1. Prologue

Sustainability is an integral part of MOL Group's day-to-day operations that aims to achieve a balanced integration of economic, environmental and social factors within the Group's corporate commitments. This implies that all areas and factors of sustainability shall also be fully integrated into MOL Group's procurement strategies, decisions and actions, ensuring that the appropriate measures are in place to monitor and continuously improve the sustainability of its entire inbound supply chain of materials and services. MOL Group is developing the relationship only with business partners and suppliers who share the same sustainable values and principles.

2. Purpose of Responsible Procurement

VISION

Sustainability shall become one of the core aspects to be taken into consideration during the definition and execution of MOL Group's procurement strategies. The concept of **MOL Group 2030+ Shape Tomorrow Strategy ("Strategy")** shall be an integrated part of Responsible Procurement, supporting the global corporate targets of the Group to make the highest possible positive impact on the future of our people, our communities, our environment – globally.

MISSION

Sustainability strategies, targets and actions should be incorporated in the standard procurement category framework of MOL Group Procurement and developed to be one of the drivers of category management, and development as well as the day-to-day execution thereof, including but not limited to the selection of products, services and suppliers for the operations.

3. Areas of Responsible Procurement

MOL Group is recognising 4 sustainability focus areas. **Targets and actions have been defined in all sustainability focus areas** to ensure MOL Group's sustainable development in collaboration with its partners and stakeholders in the supply chain. These targets are incorporated into MOL Group's procurement processes therefore the following main areas are defined in this Policy to enable the development of a functional responsible procurement operation.

3.1 Climate & Environment:

Understanding the environment in which MOL Group operates and minimising the environmental footprint are critical to maintain the corporate's legal, social and commercial licence to operate. MOL Group is continuously working on eliminating, minimizing and mitigating the negative environmental impacts in all areas of its operation. MOL Group aims to improve its waste management and emission performance, manage the impacts on water and biodiversity and address any related impacts on local communities.

As an international, integrated oil, gas, petrochemicals and consumer retail company, MOL Group has a significant carbon footprint. Transparency about the effects of its operations is considered a high priority while MOL Group is also committed to **reduce its greenhouse gas emissions in all aspects**. MOL Group's total carbon footprint includes the direct emissions from its operations (Scope 1), indirect emissions related to purchased energy (Scope 2) and also the

emissions not related to the operations directly but to the use of products and services or emissions generated otherwise by its third-party suppliers & other business partners (Scope 3).

MOL Group is committed to reduce the use of natural resources, minimize negative impacts and manage its waste by

- preparing an enhanced Group-level Waste Management Plan in order to achieve the main objectives of European Green Deal and Circular Economy by 2022,
- elaborating Water Reservation Strategy to reduce the negative environmental impact on the surface and subsurface water bodies by 2022,
- ensuring the biodiversity aspects during all greenfield development in line with EU level Biodiversity Action Plan,
- improving the efficiency of logistics activities that are strategic for MOL Group companies and are critical for decreasing CO₂ emission in respect of their core operations,
- **continuously measuring and improving Scope 3 emission calculations and actively collaborating with its supply chain actors to reduce the Scope 3 GHG emissions in order to achieve 30% reduction of the emissions entailed by the inbound supply chain by 2030 and targeting net zero by 2050.**

Actors in MOL Group's supply chain must...

- accept MOL Group's Responsible Procurement Policy and actively promote, implement and use all reasonable endeavours to enforce the same principles within their own supply chain,
- actively contribute to MOL Group's efforts and support to achieve these goals and continuously seek and provide new innovative and sustainable solutions that can still satisfy the demand of MOL Group's in the given scope of products and/or services,
- share transparently the methods, practices and tools for measuring the GHG/carbon footprint of their operations and supply chain, as well as their goals for decarbonisation,
- be committed to protect the environment and be consistent in decreasing the environmental footprint of their own operation, by minimizing the use of natural resources, waste and GHG emissions.

3.2 People & Communities: Human rights and other CSR related areas

MOL Group aims to conduct its business operations in a socially responsible manner which also complies with industry best practices. A fundamental part of MOL Group's corporate value set is the support for national, cultural, religious diversity, gender equality and diverse communities.

To fulfil these commitments and social responsibilities MOL Group has increased the support to the local communities in the geographical scope of its operations.

MOL Group's Responsible Procurement concept forbids unfair and unacceptable labour practices and requires all of the Group's internal and external partners to fully comply with the legal obligations as stipulated by the applicable labour codes and to fully respect human rights.

Actors in MOL Group's supply chain must...

- forbid child labour,
- actively avoid objectionable working conditions,
- respect the national laws about working hours and provide adequate resting period,
- ensure compliance with union and associative right,
- provide fair and regular remuneration to their employees.

3.3 Integrity & transparency

MOL Group owns its excellent reputation to the reliability of its employees, managers and business partners. Good reputation and brand equity accounts for a significant portion of the corporate's business value.

Ethical business conduct contributes to the creation of a corporate environment and culture that shall ensure the prevention or mitigation of internal and external risks and conflicts, which would jeopardize the achievement of the strategic long-term business targets, including the special focus on sustainable development.

In addition to the risk mitigation objectives, ethical, fair and transparent operation also has a tremendous positive impact on society, environment and economy as well as the future growth potential. Uncompromised integrity and good reputation support the development and maintenance of business relationships that create value, boost consumer and shareholder confidence, attract and retain talent, increase goodwill, brand trust and profitability.

Actors in MOL Group's supply chain must...

- accept and behave according to MOL Group's Code of Ethics and Business Conduct and the Business Partner Code of Ethics,
- consider its actions' impact on reputation and social environment,
- behave ethically with their partners and subcontractors.

3.4 Health & Safety

MOL Group is committed to act responsibly on the health, safety, environmental (HSE) areas and realize the social impact of its activities as part of its day-to-day operations and business conduct, including but not limited to:

- improving asset integrity to prevent incidents of any type, whilst maintaining a high standard of emergency response,
- promoting a culture in which all MOL Group employees share these commitments.

Actors in MOL Group's supply chain must...

- accept MOL Group's HSE Policy, behave accordingly and expect the same from their partners and subcontractors,
- provide safe and healthy working conditions,
- comply with the applicable labour code health and safety provisions.

4. MOL Group's commitments in the framework of Responsible Procurement

- **Actively support MOL Group's Strategy** to decrease the Group's environmental footprint, reducing greenhouse gas emissions of any kind and implement new, sustainable solutions by developing and maintaining a sustainability focused operational model.
- **Raise awareness and engagement around MOL Group's Strategy**, actively promote and appraise the sustainability goals, KPIs and achievements in relation to the sustainability of MOL Group's supply chain of purchased goods and services.
- Ensure that all MOL Group Procurement professionals, as well as business partners including but not limited to stakeholders and suppliers are made **aware of the Responsible Procurement concept**, framework and actions.
- Require all of MOL Group's **business partners to comply** with the legal and environmental requirements and standards which follow industry best practices.
- **Ensure that suppliers are properly informed, qualified and educated** in line with MOL Group's sustainability standards, and that those are being adhered to during the entire lifecycle of the business relations.
- Control and **minimize the Health, Safety, Environmental and Social risks and impacts** of all purchased operations, products and services.
- Ensure that 100% of **the category strategies include a Responsible Procurement assessment** by the end of 2022.
- Develop and maintain **a comprehensive set of targets** to improve supply chain sustainability with tangible KPIs, metrics.
- Integrate Sustainability aspects to the **supplier qualification mechanism, supplier selection decisions** and contract award process by implementing a comprehensive assessment methodology for evaluating the sustainability of each supplier's operation and supply chain.
- Operate a **risk identification and management framework** that shall provide information on the potential threats in MOL Group's third-party supply base in line with the defined risk factors related to sustainability.
- **Manage supplier relationships** driving the implementation of the common development actions as defined and mutually agreed with MOL Group's third-party vendors to efficiently mitigate risks and seize opportunities in the areas of sustainability.

5. Responsible Procurement – MOL Group Procurement targets

- All suppliers in MOL Group's supply base are expected to accept and sign the Responsible Procurement policy.
- Support the decarbonization and actively contribute to MOL Group's ambition to reach net zero by 2050. Understand and map the Scope 3 supply chain related GHG emissions and reduce those to net zero within the given timeframe.
- Assess and map the sustainability performance of MOL Group's inbound supply chain by the end of 2022. Such assessment shall provide the information on the baseline for the targeting setting for 2023 and beyond in terms of supply chain sustainability.
- Increase the level and extend the scope of active collaborations with the key market players in the areas of sustainability – MOL Group's key suppliers (covering 80% of the total third-party spend) are requested to share their ambitions, commitments and

specific targets on reducing greenhouse gas emissions, waste and energy, and moving towards a circular economy.

- Cover 80% of MOL Group's third-party spend by systematic sustainability assessments using questionnaires and scorecards, which will allow the tracking and monitoring of the sustainable development, e.g. the audited reduction of the supply chain related Scope 3 carbon emissions year on year.
- Communicate and promote the Responsible Procurement results regularly to suppliers, stakeholders, via internal/external communication channels and non-financial report frameworks.
- Reduce the supply chain related Scope 3 carbon emissions of MOL Group by 30% till 2030 as the first milestone towards the 2050 net zero target.

6. Responsible Procurement – supply chain requirements

MOL Group Responsible Procurement Policy represents commitments to support the sustainability principles and values that are to be shared with all suppliers of MOL Group. Therefore, all suppliers of MOL Group are requested to accept and sign this Policy, through which they undertake to:

- **cooperate and collaborate** in the efforts towards MOL Group's strategic targets to improve sustainability in its inbound supply chain,
- **work on decarbonization:** contribute to the ambition to reach net zero by 2050
 - **set targets** – cooperate to have at place their own Sustainability related processes, targets, actions, reports, transparency. These can be audited by designated persons.
 - **share with MOL** – to share their sustainability practices, targets, and measurements
- ensure that **their own suppliers and subcontractors also comply** with this Policy, its values, principles, requirements and commitments.
- cooperate in **assessment and monitoring** activities.
- **participate in MOL Group's reporting** activities as and when requested and implement action plans during sustainability risk assessment reviews.
- authorise MOL Group to use the reported data for non-financial reporting, further analysis of compliance.
- **ensure legal compliance** in terms of acquiring and holding the necessary authorisations, permits and expertise in their scope of operation in relation to the goods and services supplied to MOL Group. Upon request suppliers should provide proof of responsible business conduct in the areas defined in this Policy.
