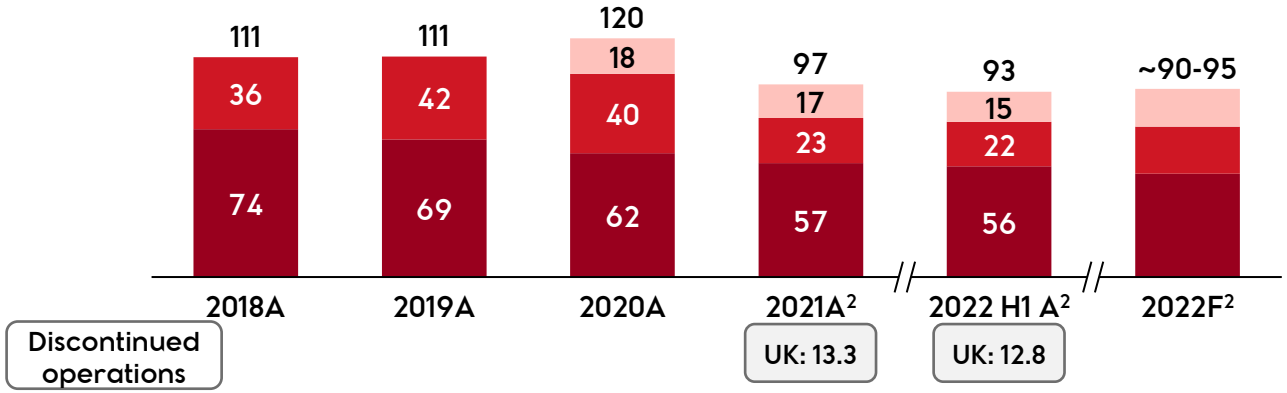
~93 MBOEPD DELIVERED IN LINE WITH UPDATED GUIDANCE FOR 2022

ACG | E&P International excl. ACG | CEE

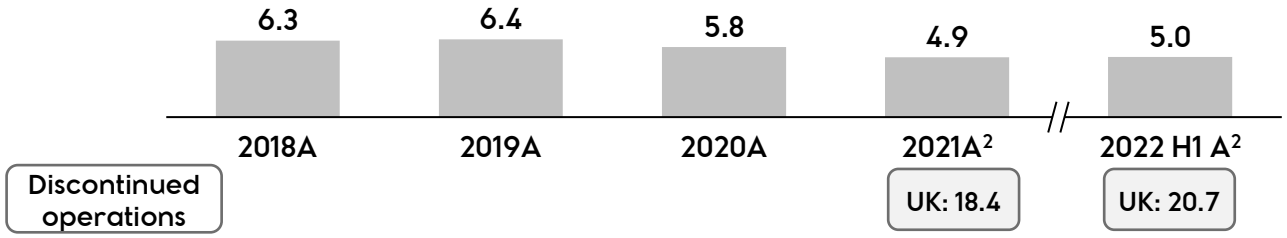
PRODUCTION[1] (MBOEPD)



COMMENT

- Production in line with guidance of above 90 mboepd for 2022
- 2022 H1: Natural decline in CEE is partially offset by the strong performance of Kurdistani assets
- Less production from ACG since a favourable oil price scenario in 2022 H1 led to a lower entitlement share as per the PSA regime, together with base decline

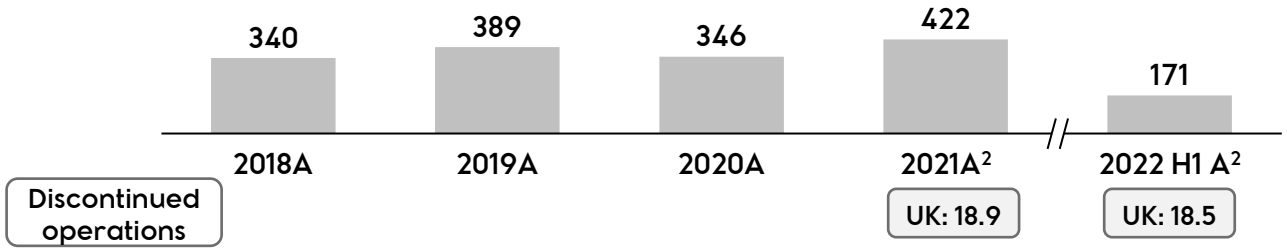
UNIT DIRECT PRODUCTION COST[1] (USD/BOE)



COMMENT

- 2022 H1: UDPC remains in a very competitive range due to cost effective operations and alleviation of inflation's effect through a strengthening US Dollar
- Realized UDPC is fully in line with our strategic target of maintaining costs between ~5-7 USD/boe

CAPEX[1] (USD MN)



COMMENT

- Capital spending in alignment with portfolio plans for the year
- Strong cost scrutiny maintained

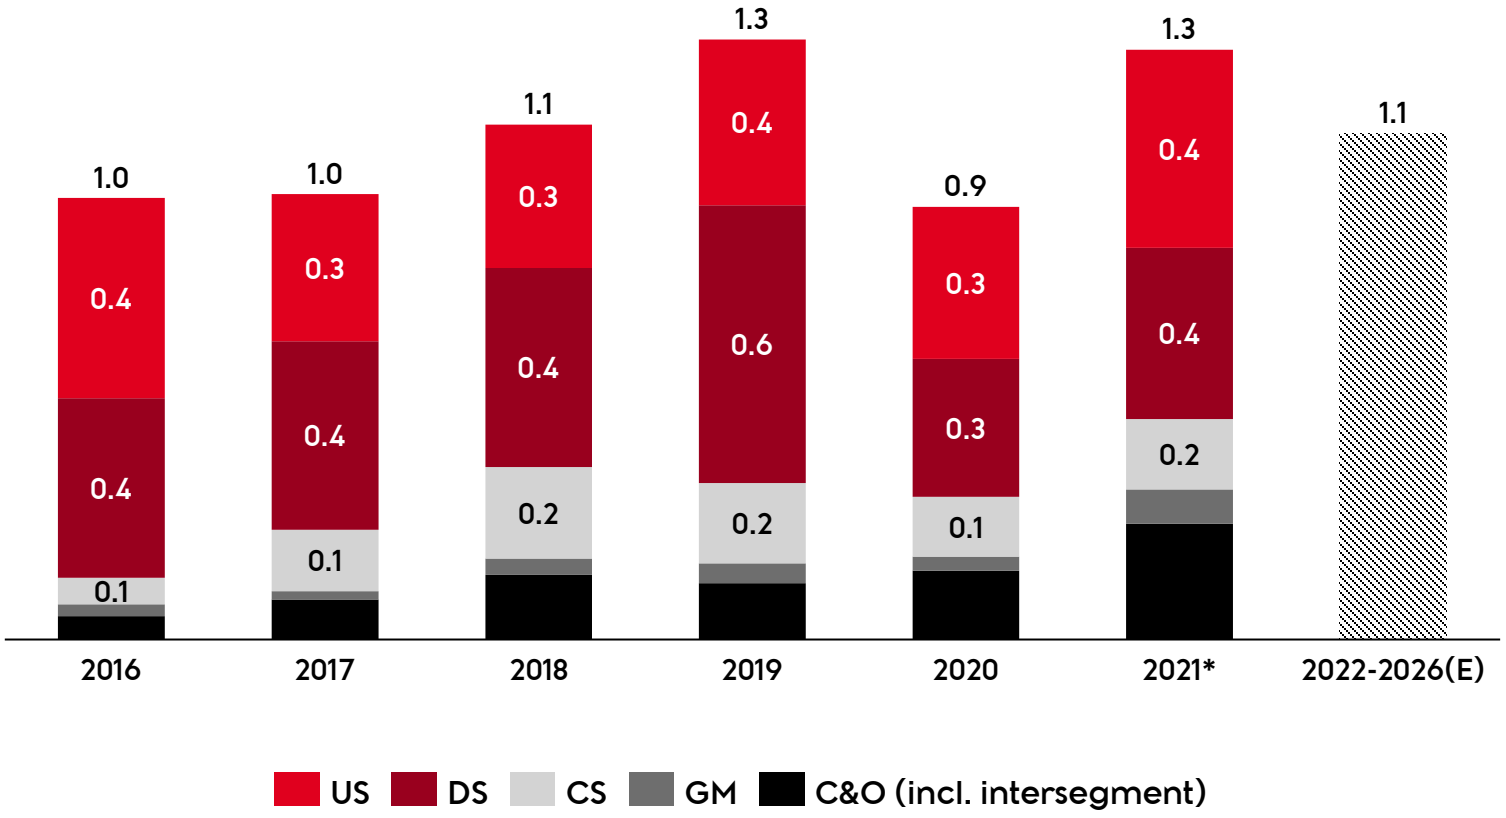
„SUSTAIN" CAPEX TO BE KEPT AROUND USD 1.1BN IN 2022-26

SUSTAIN CAPEX (USD BN)



COMMENTS

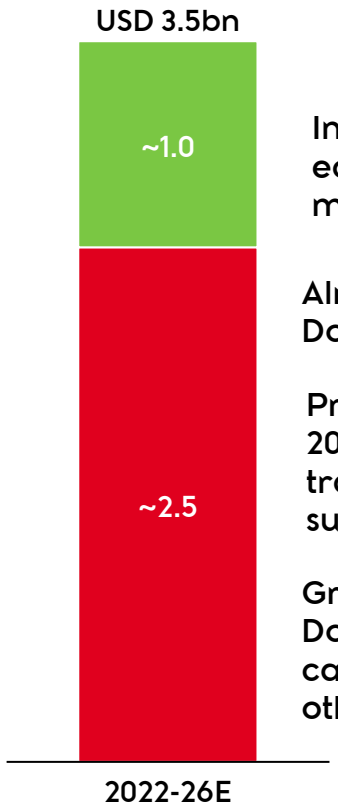
- In 2020 sustain capex declined materially in response to the crisis (delayed projects, lower maintenance) followed by a moderate an uplift in 2021 mainly driven by deferrals from 2020
- 2022 sustain CAPEX is expected to to be in line largely in line with 2021
- USD ~1.1bn annual average for 2022-26 represents lower „sustain" capex for the group vs. 2021/22 levels

*2021 results include discontinued operation

USD 3.5BN STRATEGIC CAPEX BUDGETED FOR THE 2022-26 PERIOD

TO FUND TRANSFORMATION AND NEW, LOW-CARBON BUSINESSES

STRATEGIC, GROWTH, TRANSFORMATIONAL CAPEX IN 2022-26



Investments in new, low-carbon, circular economy businesses (mainly waste management)

Already running/approved strategic projects in Downstream (polyol, Rijeka delayed coker)

Pre-FID strategic projects in Downstream for 2022-26, primarily aiming at fuel-to-chemicals transformation, diversification and sustainability

Growth (and efficiency) projects mainly in Downstream targeting extended margin capture (methathesis, maleic anhydride and others)

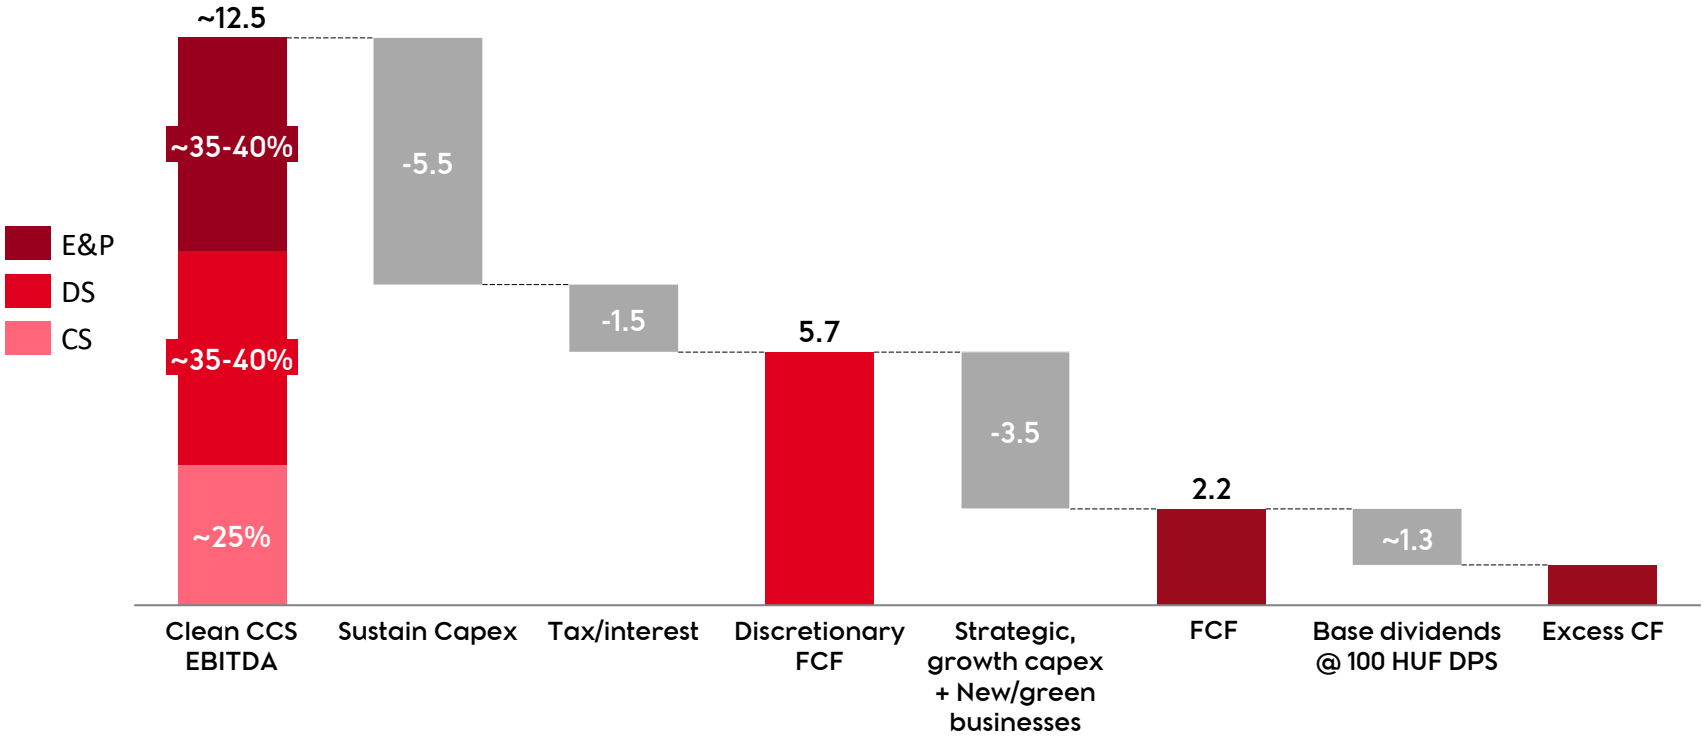
COMMENTS

- Even with a conservative mid-term macro set, in the 2022-26 period at least USD 3.5bn capex (around USD 700mn annually) will be available and earmarked to fund the fuel-to-petchem transformation and the low-carbon, green transition
- Annual distribution of this capex pool may fluctuate along with project timelines, approvals
- Additional capex pool may be available to fund the low-carbon transition and/or M&A if excess cash is generated due to a stronger-than-assumed macro and financially attractive projects reach FID phase

FULLY FUNDED TRANSFORMATION AND BASE DIVIDENDS IN 2022-26

EVEN AGAINST A VERY CONSERVATIVE MACRO ENVIRONMENT

FINANCIAL FRAMEWORK PROJECTIONS FOR 2022-26 (USD BN)[1,2]



COMMENTS

Even with conservative macro assumptions

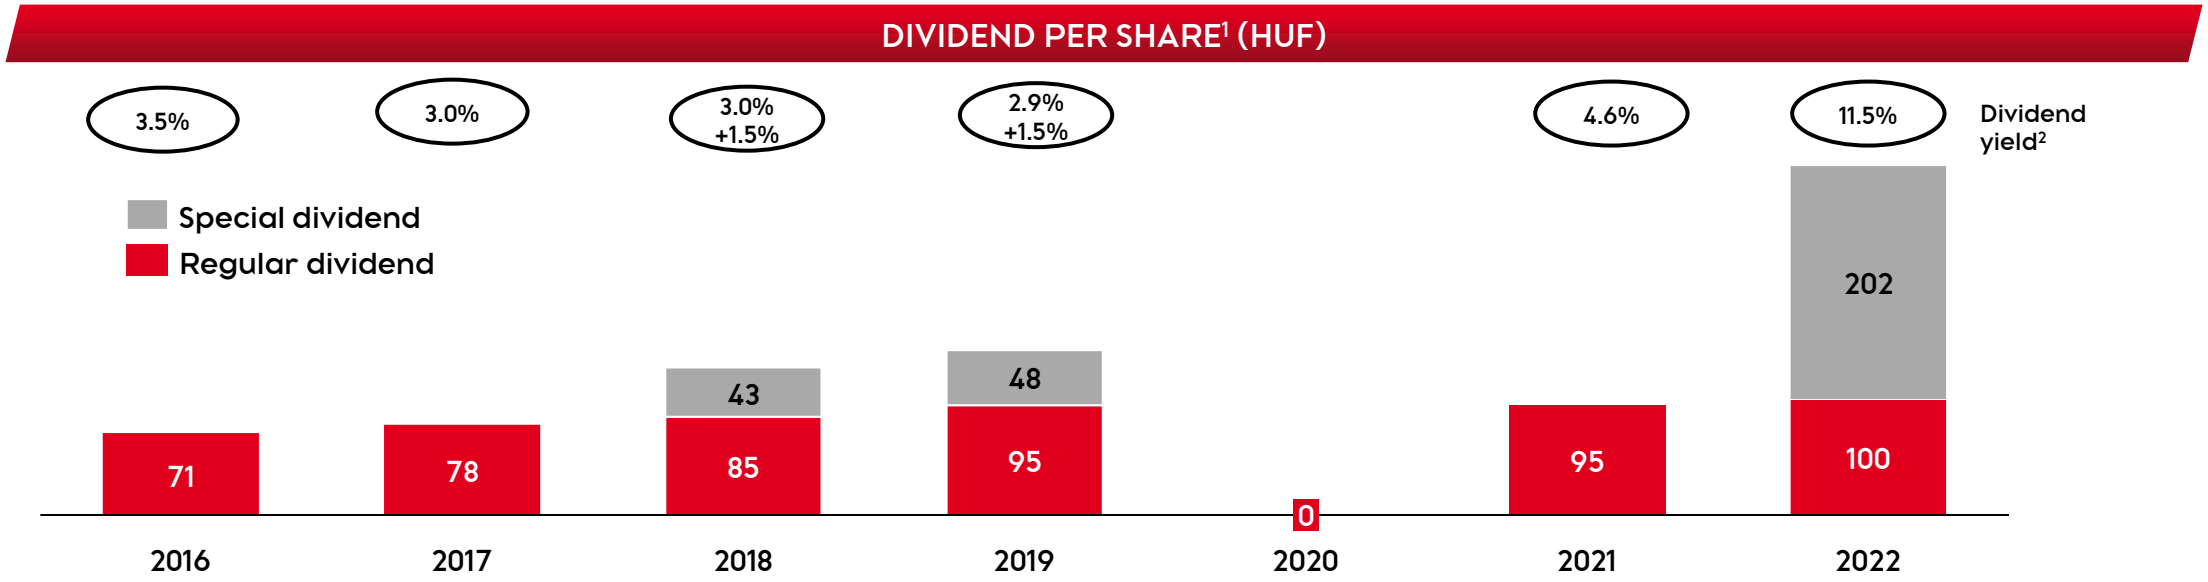
- sufficient cash (~USD 12.5bn) will be generated in the next 5 years to fund
- „sustain" capex of USD 5.5bn
- cash outflows on taxes, interest
- around USD 3.5bn strategic capex, including new, low-carbon businesses
- Fully funded base dividend, distribution is expected to grow in line with previous years' track record

Remaining excess CF can fund continued special dividend payments, M&A and further accelerate transition

(1) Excluding ongoing M&A, changes in working capital
(2) Assuming macro figures presented on slide 69.

BASE DIVIDEND INCREASED BY MORE THAN 40% SINCE 2016

COMPLEMENTED BY SIZEABLE SPECIAL PAYOUTS IN 2018, 19, 22

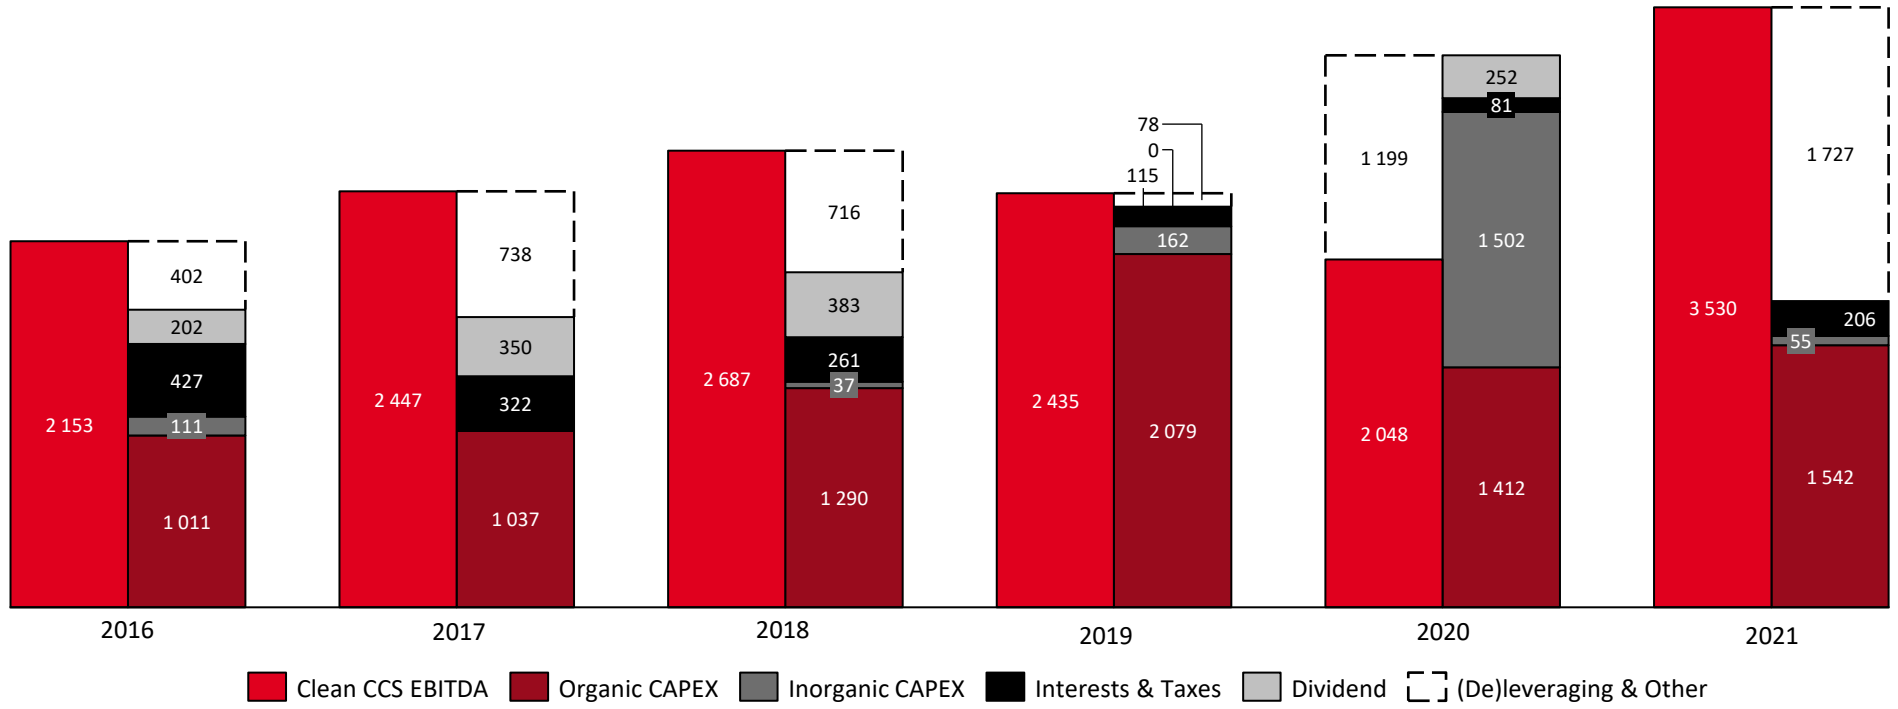


- Cash dividend remains the primary distribution channel
- Base dividend is expected to grow gradually over the 2022-26 period
- Special dividend payments may continue if excess cash is generated and all low-carbon transition-related capex need is covered
- Rising base dividend in 2022: MOL raised the base dividend to around HUF 100 per share from last year's HUF 95 per share, thus continuing the previous trend of gradually increasing base dividend
- Special dividend in 2022: MOL generated record high EBITDA and free cash flow in 2021 supported by very strong macro conditions, therefore the BoD proposed an additional special dividend amounting to around HUF 200 per share

(1) Restated to reflect post share split values
(2) Calculated with publication date (AGM) share prices

SOURCES AND APPLICATIONS OF CASH

SOURCES AND APPLICATIONS OF CASH, 2016-2021 (USD MN)[1,2]



- EBITDA/CAPEX gap should cover taxes, cost of funding, dividends and small-size M&A...
- ...and would also contribute to funding the upcoming transformational projects

(1) Dividends refer to the year when they were earned, rather than when they were paid out

(2) Dividend payment for the year 2021 is yet to be declared.

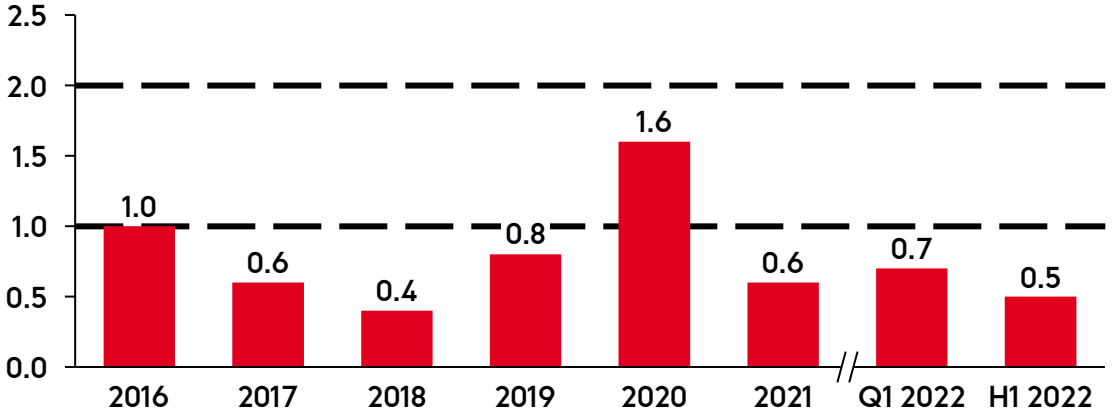
COMMENTS

- In June 2022 Fitch revised outlook to negative from stable while reaffirming investment grade rating of BBB-
- In June 2022 Standard & Poor's reaffirmed investment grade rating of BBB- with stable outlook
- Strong financials in line with favorable macro environment

NET DEBT TO EBITDA (X)



COMMENTS

- Credit metrics shall remain commensurate with investment grade credit rating
- Following a temporary jump in 2021 leverage fell below pre-ACG acquisition levels on the back of strong 2021 CF generation
- Balance sheet flexibility may in the future again be used to grab new business opportunities (including funding M&A in all businesses)

INA: FOCUS ON SECURING RETURN ON OUR INVESTMENT

REALITIES AND PRIORITIES

- MOL 2030 strategy can be and will be executed with or without INA
- Good geographical fit and untapped efficiency upside in downstream
  - Construction of Rijeka Refinery upgrade
  - Conversion of Sisak site to various industrial activities
- Yet, the relative importance of INA has declined within MOL Group
- Priority: to maximise the value of MOL's investment in INA:
  - Keeping/operating INA on market-based terms and with a MOL-controlling position or
  - Selling/monetizing the investment
- Legal proceedings continue; first arbitration in favour of MOL (all Croatian claims rejected)

STRONG REGIONAL ASSET BASE

- Low-cost E&P in Croatia* (both onshore and off-shore)
- Coastal refinery (Rijeka)
- Extensive retail network
