Q4 and Full Year 2007

STRONG RESULTS FOR THE 3\textsuperscript{RD} CONSECUTIVE YEAR
"This presentation and the associated slides and discussion contain forward-looking statements. These statements are naturally subject to uncertainty and changes in circumstances. Those forward-looking statements may include, but are not limited to, those regarding capital employed, capital expenditure, cash flows, costs, savings, debt, demand, depreciation, disposals, dividends, earnings, efficiency, gearing, growth, improvements, investments, margins, performance, prices, production, productivity, profits, reserves, returns, sales, share buy backs, special and exceptional items, strategy, synergies, tax rates, trends, value, volumes, and the effects of MOL merger and acquisition activities. These forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from those expressed or implied by these forward-looking statements. These risks, uncertainties and other factors include, but are not limited to developments in government regulations, foreign exchange rates, crude oil and gas prices, crack spreads, political stability, economic growth and the completion of ongoing transactions. Many of these factors are beyond the Company's ability to control or predict. Given these and other uncertainties, you are cautioned not to place undue reliance on any of the forward-looking statements contained herein or otherwise. The Company does not undertake any obligation to release publicly any revisions to these forward-looking statements (which speak only as of the date hereof) to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except as maybe required under applicable securities laws.

Statements and data contained in this presentation and the associated slides and discussions, which relate to the performance of MOL in this and future years, represent plans, targets or projections."
Our results confirm our organic growth prospects, targeting 6.5% EBITDA CAGR by 2011

(1) In converting HUF financial data into USD, the following average NBH rates were used: for Q4 2006: 201.9 HUF/USD, for FY 2006: 210.5 HUF/USD, for Q4 2007: 174.5 HUF/USD, for FY 2007: 183.8 HUF/USD.

(2) The Group has changed its accounting policy to disclose Hungarian local trade tax and innovation fee as income tax expense as these tax types show the characteristics of income taxes rather than operating expenses. In previous years, local trade tax has been recorded as operating expense.

(3) Operating profit excludes the one-off gain and the profit of the gas subsidiaries sold (Wholesale and Storage) of HUF 82.8 bn in 2006 and in FY 2007 the one-off gain on the acquisition of TVK shares (HUF 14.4 bn) realised and subsequent settlement from E.ON in connection with the gas business sales of HUF 44.2 bn, of which HUF 26.8 bn income has been accrued in Q4 2007 for the settlement period of July-December 2007, the payment of which is expected to take place in Q1 2008.

(4) Net income in addition to adjustments detailed in (3) excludes the benefit from MOL Plc’s tax holiday (HUF 33.0 bn calculated at 16% tax rate) in FY 2006.

(5) Net income in addition to adjustments detailed in (3) excludes the non-cash fair valuation difference of the conversion option of Magnolia.

(6) Data in USD.
Q4 2007 Operating profit drivers:
+ strong increase in downstream (20%) and petrochemical (9%) sales volumes
+ high crude prices
+ outstanding crack spreads
+ positive inventory impact
- lower integrated petrochemical margins
- lower hydrocarbon production

(1) Operating profit excludes the one-off gain and the profit of the gas subsidiaries sold (Wholesale and Storage) of USD 394.9 mn in 2006 and in FY 2007 the one-off gain on the acquisition of TVK shares (USD 74.7 mn) realised and subsequent settlement from E.ON in connection with the gas business sales of USD 249.1 mn, of which USD 154.1 mn income has been accrued in Q4 2007 for the settlement period of July-December 2007, the payment of which is expected to take place in Q1 2008.
Gearing returned to targeted level

Gearing ratio\(^{(1)}\) reached at 35.5% as a result of the capital optimization program.

Gearing ratio decreased below 30% after the share sale to CEZ (in January 2008)

Increase of the dividend payout ratio towards 40%, subject to available investment opportunities.

---

\(^{(1)}\) Net debt to the sum of net debt and total equity

\(^{(2)}\) 2006 Dividend Payout Ratio. Source: Factset
Doubling investments boosted by acquisitions

CAPEX by segments (USDm)

E&P R&M Gas Petchem C&O

Organic Acquisition

E&P Acquistion of Russian exploration company (Matjushkinskaya)

R&M Acquisition of IES and Tifon. Retail expansion to Bosnia (Energopetrol capital increase), and filling station expansion in Serbia.

Gas Large-scale strategic projects including strategic gas storage and enlarging the import capacity.

C&O TVK share acquisition.
Downstream – strong crack spreads, but lower Brent-Ural diff.
### Downstream – strong volume growth

**Q4 2007 Operating profit drivers:**

+ 23% increase in production volumes (up 15% excluding IES contribution)
+ 20% increase in sales volumes (up 12% excluding IES contribution)
+ 12% growth in fuel sales to end-users
+ strong crack spreads for our major products
  - Weakening of US dollar against local currencies
  - Brent-Ural spread change

We believe we maintained our efficiency leadership among European refiners in 2007.
Petrochemical – strong integrated margin in 2007

Integrated margin slightly increased in 2007…
…but Q4 margin dropped back to 408 EUR/t

Integrated margin - quarterly averages (EUR/t)

2007: 501.5 EUR/t
2006: 469 EUR/t
### Petrochemicals – strong volume growth

**Q4 2007 Operating profit drivers:**
- higher product price (USD-terms)
- +/- our acquisitions in Russia boosted int’l crude production by 6% partly offsetting the production decrease from our mature domestic fields.
- Gas production has declined by 17% from which 15% decrease was caused by the suspended production of the Szőreg-1 field in Q4 2007 y-o-y.
- the weaker USD against the HUF

**Gross hydrocarbon production (boe/day)**

![Graph showing gross hydrocarbon production]
Production plan for 2008

We expect stabilizing natural gas production while crude production from the recently acquired Russian fields is expected to compensate most of the domestic crude production decline.

Hungary

Our main goal is to maintain the production level, while keeping the top-European profitability. To achieve it we have started strong field development to put into operation our existing reserves and parallel carry out intensive exploration to discover new reserves.

- Intensive field development
- Investigation of EOR / EGR potential
- Unconventional exploration together with ExxonMobil
- Intensive exploration with partners - sharing risks

International

We will develop a stronger, more balanced portfolio with more upside opportunities at an appropriate risk level

- Field development in Russia and Pakistan
- Exploration near producing assets to identifying upside potentials
- Expand our portfolio leveraging our competitive advantages, our target areas include CIS, Middle East and Africa
Existing portfolio: Solid basis for further growth

- Russia, Surgut-7 Block
  - Production*: 62,900 boepd
  - Reserves**: 209.8 MMboe
- Hungary
  - Production*: 62,900 boepd
  - Reserves**: 209.8 MMboe
- Matyushinskaya Block
  - Production*: 600 bblpd
  - Reserves**: 2.2 MMbbl
- Pakistan, Margala and Margala-N Blocks
- Kazakhstan, Fedorovsky Block
- Kurdistan (Iraq), Akri-Bijel and Shaikan Blocks
- Cameroon, Ngosso Permit Block
- Yemen, Block 48
- Oman, Block 43B
- ZMB field
  - Production*: 23,900 bblpd
  - Reserves**: 49.4 MMbbl
- Tal Block
  - Production*: 1,200 bblpd
  - Reserves**: 14.8 MMboe
- Tal Block
  - Production*: 1,200 bblpd
  - Reserves**: 14.8 MMboe

*Preliminary average hydrocarbon production in 2007 (boepd).
** Preliminary 2P reserves according to SPE as of 31.12.2007. Final number will be presented in the Annual Report.

...contribute to growing production profile

Planned daily production based on our existing portfolio weighted by geological risk (thboepd)

2008-2013: CAGR: 7.7%
Outlook

Downstream
► We expect similarly healthy refinery environment for 2008, especially for our favorable refinery yield and technology
► Planned refinery turnaround at Duna and Slovnaft refineries with no material impact on sales volume, while IES contributes to additional 2.6mt production volume
► Downstream hydrocrack project is on schedule – basic design has been completed

Petrochemicals
► We expect modest improvement in integrated petrochemical margin for 2008 from the Q4 2007 bottom

Natural gas
► NETS as a joint, regional gas transmission company could address all challenges and start a growth story for all owners and companies

Committed to continue our stated M&A strategy
► Continuous analysis of downstream acquisition opportunities in the broader region (including Italy and CIS). Our primary target is INA
► Possibilities for straightforward acquisition are limited in the region…
► … we expect more complex transactions in the future, including utilizing treasury shares as acquisition currency.
