Q4 PERFORMANCE WAS IMPACTED BY MUCH WORSE DOWNSTREAM ENVIRONMENT

However, an excellent full year result in DS partly offset declining US contribution

► Upstream performance boosted by revision of provisions offsetting declining production and realized price

► Downstream hit by deterioration in external conditions

► One-offs increased reported EBITDA by HUF 19bn, but lowered EBIT by HUF 50bn

► Operating cash flow amounted to HUF 249bn

► Declining Upstream due to natural decline, lower net entitlement (Adriatic offshore), divestiture of ZMB and 10% lower realized price

► 4% better CCS-based Downstream result despite major headwinds in external conditions as a result of the New Downstream Program and improving sales

► Gas midstream delivered similar results as in 2013, last time with the storage business
