** Including JVs and associates
*** Total Recordable Injury Rate
SOLID, CONSISTENT EBITDA GENERATION
RESILIENT INTEGRATED BUSINESS MODEL IN A HIGHLY VOLATILE ENVIRONMENT

EXTERNAL ENVIRONMENT* VS MOL CLEAN CCS EBITDA (USD MN)

* The quarterly % values of the Refinery Margin, Petchem Margin and Brent price are measured against their respective maximum values (100%) in the period of Q1 2012 – Q3 2018
100% equals to the following values:
MOL Group Refining Margin: 7.3 USD/bbl; MOL Group Petchrochemicals margin: 654 EUR/t; Brent crude: 119 USD
Q3 2018: STRONGLY RISING EBITDA AND FCF

IMPORTANT MILESTONES ALONG THE MOL 2030 STRATEGY

FINANCIAL HIGHLIGHTS

- Clean CCS EBITDA jumped 23% YoY in Q3 2018 to USD 708mn, bringing 2018 ytd EBITDA to just over USD 2bn
- Simplified FCF rose 22% YoY to USD 398mn, bringing the ytd FCF to USD 1.29bn, reaching the upper end of the full-year guidance range
- Upstream EBITDA jumped 70% YoY to USD 319mn on rising oil&gas prices
- Downstream Clean CCS EBITDA was around flat at USD 262mn in Q3 despite materially weaker margins
- Consumer Services EBITDA continued its double-digit growth to new all-time highs (+11% YoY to USD 147mn)
- Credit metrics further improved in Q3 2018 on the very strong cash generation and despite a large build in NWC; Net Debt/EBITDA and gearing fell to 0.46x and 13%, respectively

OPERATIONAL HIGHLIGHTS

- Oil & gas production was marginally lower in Q3 2018 at 108 mboepd, as rising UK production (Catcher) mostly offset the impact of the usual annual turnarounds
- MOL signed four lump-sum EPC contracts with thyssenkrupp for the implementation of the Polyol Project
- MOL and APK, a German recycling technology company, signed a strategic cooperation agreement
- For the third year in a row MOL was selected as an index component of the Dow Jones Sustainability Indices (DJSI) during the 2018 indices review process

Heavy fuel oil leakage into the emergency tank during the sampling of a tank at Slovnaft Refinery.

RECOGNIZING SUSTAINABILITY

- MOL demonstrated once again strong sustainability performance by being included in the Dow Jones Sustainability Index for the third year running.
- Being part of the DJSI places MOL in the top 15% global O&G industry, and is the sole Emerging European corporate to be included in the index.
- Given the rise of sustainable investing, index inclusions are key for MOL as these are used by a wide variety of capital market players to create and assess responsible investment funds.

HUMAN CAPITAL

- Given the persistently tight CEE labour market, MOL Group’s employee referral program was rolled out across the group aiming at improving recruitment prospects, shortening time to fill open positions and enhance engagement.

DOWNSTREAM

- Several site visits were undertaken by AON at MOL Petchem and Slovnaft Refinery resulting in closure of previous recommendations at both sites, and generating new recommendations to further improve process safety.

Q3 COMMENTS

Downstream
▸ Much weaker refinery and petchem margins, offset by much stronger internal performance YoY

Consumer Services
▸ Strong growth is primarily non-fuel driven

Upstream
▸ Strong oil and gas prices, rising Catcher contribution

Gas Midstream
▸ Materially lower EBITDA YoY on significantly lower volumes and rising energy cost

SEGMENT CLEAN CCS EBITDA YTD (USD mn)

Q1-Q3 2017 1,873
Q1-Q3 2018 2,001

+7%

Q1-Q3 COMMENTS

Downstream
▸ Affected by the weaker external environment

Consumer Services
▸ Fuel volumes, margins and non-fuel all contributed to EBITDA growth, partly offset by higher opex

Upstream
▸ Higher oil and gas prices, high-margin Catcher barrels

Gas Midstream
▸ Lower EBITDA on weak Q3 performance
Higher CAPEX in Q3 from a Low Base

Organic capex was 24% higher YoY in Q3 2018 at USD 310mn.

Total Q1-Q3 2018 capex of USD 713mn represented a 18% increase from a fairly low base.

There was no material M&A in 2018 ytd.

Overall, there was no material changes in E&P and Downstream spending ytd vs the previous year.

Consumer Services capex nearly doubled both in Q3 and in Q1-Q3 YoY, in line with plans, mostly driven by the accelerated site reconstruction activity and the related rollout of the non-fuel concept, and the launch of new mobility services (e.g. Fleet management).

Corporate and other (C&O) segment includes spending related to the new HQ.

### Q3 Comments

- **Group-level simplified FCF** (Clean CCS EBITDA less organic capex) increased by 22% YoY to USD 398mn in Q3 2018 and was only slightly below the Q2 level.
- Upstream more than doubled its FCF YoY, contributing more than half of the Group FCF in Q3.
- Downstream FCF was flat YoY despite the adverse macro.
- Rising investments kept FCF generation slightly weaker in Consumer Services in Q3.

### Q1-Q3 Comments

- **Group-level simplified FCF** edged up in Q1-Q3 2018 to 1.29bn, reaching the higher end of the previously upgraded full-year guidance range (of USD 1.1-1.3bn).
- Upstream contributed more than 50% of the Group FCF on jumping oil and gas prices.
- Downstream FCF was affected by the materially weaker macro.
- Consumer Services' simplified FCF was flat YoY, as higher capex offset higher EBITDA.
- Gas Midstream saw a decline in FCF YoY due to the weaker Q3 performance.

COMMENTS

- Materially higher DD&A in E&P (primarily on Catcher, also on Hungary, Norway)
- USD 142mn positive CCS modification on rising oil prices
- Small positive special item (USD 17mn from Q2)
- Financial items: FX losses (USD 56mn ytd) on the weaker HUF, slightly lower net interest expenses
- Associates: dominated by Pearl, Baitex contribution
- Around flat cash taxes YoY
OPERATING CASH FLOW SLIGHTLY LOWER YOY DUE TO A LARGE BUILD IN NET WORKING CAPITAL IN Q3

<table>
<thead>
<tr>
<th>USB mn</th>

<td>114</td>
<td>128</td>
<td>2,103</td>
<td>598</td>
<td>1,505</td>
<td>713</td>
</tr>
</tbody>
</table>

COMMENTS

- Operating Cash Flow before Working Capital came in at USD 2.1bn in Q1-Q3 2018, jumping by 27% YoY.
- There was a substantial, USD 315mn build in net working capital (NWC) in Q3, as opposed to a draw a year ago, bringing to the total NWC build to close to USD 600mn ytd. The Q3 build was partly driven by the rising oil price environment, but partly also by timing issues. This latter may later be reversed.
- Operating Cash Flow (after NWC changes) was USD 1.51bn in Q1-Q3 2018, 6% lower YoY.
- Operating Cash Flow could still very comfortably cover organic CAPEX as well as the 2017 dividend payment (including the special dividend).
STRONGER BALANCE SHEET, MODERATE LEVERAGE
FURTHER IMPROVING CREDIT METRICS IN Q3 2018

NET DEBT TO EBITDA (x)

GEARIMG (%)

DEBT CURRENCY COMPOSITION (HUF bn)

COMMENTS

- Net debt/EBITDA and net gearing declined further in Q3 2018 (to 0.46x and 13% resp.) on the back of the strong FCF generation, which was only partly used for financing the substantial working capital build

- Considerable financial headroom and liquidity maintained

</table>

**COMMENTS**

- Downstream Clean CCS EBITDA amounted to USD 262mn in Q3, only marginally lower YoY
- Both refinery and petchem margins were down materially YoY, the integrated petchem margin averaged close to mid-cycle levels at 362 EUR/t
- Strong volumes and improved internal performance vs. relatively low base in R&M (larger one-offs a year ago) offset the deteriorating macro
- Motor fuel demand still on the rise (CEE +4% in Q1-Q3)
PETCHEM MARGIN DROPS TO MID-CYCLE LEVELS

REFINERY MARGINS STILL PROVIDED SUPPORT YTD DESPITE FALLING YOY

REFINING MARGIN (USD/bbl)

- Total MOL Group refinery margin
- Complex refinery margin (MOL+5N)

INTEGRATED PETCHEM MARGIN (EUR/t)

- NEW MOL Group petrochemicals margin
- OLD Integrated petrochemical margin (EUR/t)(16)

COMMENTS

➤ Refining margins edged up in Q3 as motor fuel cracks received support from healthy demand in the driving season
➤ However, margins dived in September driven by the collapsing gasoline crack and the further rising oil price
➤ The integrated petchem margin remains close to the 350 EUR/t level, representing a three-year low and corresponding to around „mid-cycle“ levels; the butadiene–naphtha spread has been very healthy

UTILIZATION & TURNAROUNDS

➤ Processing was up by 9% in Q3 YoY despite the unplanned event in Bratislava that resulted in 240 kt crude processing shortfall
➤ Late Q3/early Q4: Steam Cracker-2 planned maintenance in MOL Petrochemicals completed
➤ Early-2019 turnaround: major shutdown of Rijeka refinery is scheduled for Q1 2019
### IMPROVED R&M, HIGHER VOLUMES SUPPORT Q3
DOWNSTREAM CLEAN CCS EBITDA PRACTICALLY UNCHANGED YOY

#### CLEAN CCS EBITDA YoY (USD mn)

<table>
<thead>
<tr>
<th></th>
<th>Q3 2018</th>
<th>Q3 2017</th>
<th>YoY %</th>

<td>115</td>
<td>+135%</td>
</tr>
<tr>
<td>R&amp;M</td>
<td>156</td>
<td>66</td>
<td>+135%</td>
</tr>
</tbody>
</table>

**Comments**
- Weaker macro in both petchem, and refining dented DS profits
- Improving pricing (sales margins) in R&M (from the low Q3 2017 base) offset the 1.3 USD/bbl headline margin drop
- 6% increase in processing in Danube and Bratislava refineries and 4% higher sales
- Others: higher opex mainly in R&M (higher CO_2 (USD 10mn) and material cost and wage pressure)

#### DOWNSTREAM EBITDA YTD (USD mn)

<table>
<thead>
<tr>
<th></th>
<th>Q1-Q3 2018</th>
<th>Q1-Q3 2017</th>

</tr>
<tr>
<td>R&amp;M</td>
<td>551</td>
<td>116</td>
<td>+480%</td>
</tr>
</tbody>
</table>

**Comments**
- Negative macro developments remained in the driving seat ytd
- Stronger internal performance and higher volumes could only partly offset the weakening margin environment
- Others: mainly driven by the same items as in Q3

*Note: price & margin includes FX impact*
CONSUMER SERVICES
Q3 2018 RESULTS
DOUBLE-DIGIT EBITDA GROWTH MAINTAINED
SUPPORTED BY STRONG NON-FUEL MARGIN GROWTH

EBITDA grew by 11% in Q3 2018 YoY, maintaining the double-digit growth driven by the dynamic expansion of non-fuel margin and also supported by healthy fuel market trends.

Higher investments reflect the increasing pace of the site reconstructions and Fresh Corner rollout.

Higher opex reflects regional wage pressure and higher commissions due to the new operational model in Slovakia.
L-F-L FUEL SALES INCREASING 2.6% YOY

Total sales volumes of MOL rose by 2.5%
Like-for-like volumes growth was 2.6%, slightly behind the motor fuel demand growth in the relevant CEE markets (which showed significant differences in growth rates from country to country)
Strong focus on total fuel margin optimization

Fuel throughput/site (mn litres/year) continued to expand
4-year CAGR for throughput/site stands at 2.7% on a expanding network, reflecting relentless focus on efficiency
NON-FUEL CONTRIBUTION MATERIALLY HIGHER

4-YEAR CAGR OF NON-FUEL MARGIN PER SITE AT 14%

NON-FUEL MARGIN (USD MN)

- Q2 2017: 46.2
- Q3 2017: 58.4
- Q4 2017: 52.5
- Q1 2018: 51.7
- Q2 2018: 64.3
- Q3 2018: 70.8

- 4Y CAGR: +21%

Non-fuel margin share of total (%)

- Q3 2014: 23.1
- Q3 2015: 22.3
- Q3 2016: 26.3
- Q3 2017: 32.2
- Q3 2018: 38.6

4Y CAGR: 14%

COMMENTS

- Accelerated non-fuel concept rollout continued: number of reconstructed sites with Fresh Corners rose to 606 from 363 a year ago.
- The share of non-fuel margin continued to dynamically grow YoY to 27% in Q3 2018 (up 3-ppt).

COMMENTS

- Non-fuel margin/site (’000 USD) grew 14% in the past four years on average.
- This reflects the shifting focus to non-fuel margin generation and the roll-out of the non-fuel concept over the last three years.

![Bar chart showing annual price realization, EBITDA, and FCF for 2013 to 2018 YTD.](chart2)

* Based on: Simplified FCF = EBITDA Excl. Special Items – Organic CAPEX
**EBITDA BOOSTED BY RISING OIL AND GAS PRICES**

**RIISING CATCHER PRODUCTION COMPENSATED SHRINKING CEE GAS VOLUMES**

### UPSTREAM EBITDA QoQ (USD mn)

- **EBITDA ex-oneoff Q2 2018**: 325
- **Prices & FX**: 18
- **Volumes**: 5
- **Exploration Expenses**: 0
- **Lifting cost**: 1
- **Other**: 30
- **EBITDA ex-oneoff Q3 2018**: 319
- **Depreciation ex-oneoff**: 178
- **EBIT ex-oneoff Q3 2018**: 141

### COMMENTS

- Positive price impact reflects slightly higher Brent prices and 9% stronger gas prices QoQ
- Small positive volumes impact as sales exceeded production
- Others: primarily a base effect, as Q2 included overdue receivables collection in Egypt and KRI (around USD 23mn)

### UPSTREAM EBITDA YTD (USD mn)

- **EBITDA ex-oneoff Q1-Q3 2017**: 635
- **Prices & FX**: 282
- **Volumes**: 41
- **Exploration Expenses**: 6
- **Lifting cost**: 8
- **Other**: 12
- **EBITDA ex-oneoff Q1-Q3 2018**: 931
- **Depreciation ex-oneoff**: 540
- **EBIT ex-oneoff Q1-Q3 2018**: 391

### COMMENTS

- Jumping oil and gas prices resulted in a 35% uplift in realized prices ytd
- Positive volumes impact reflects high-margin Catcher (UK) barrels
- Slightly higher lifting cost entirely related to FX changes (weaker USD)

*Notes: consolidated figures, unless otherwise indicated*
MARGINALLY LOWER PRODUCTION IN Q3 2018

October Estimate: 112.0 mboepd

COMMENTS

Q3 2018 QoQ (vs. Q2 2018):
- UK: +2.4 mboepd on rising Catcher contribution
- CEE: -2.8 mboepd on annual turnarounds in Croatia

Q3 2018 YoY:
- UK: +10.8 mboepd on Catcher starting up and ramping up
- CEE: -5.8 mboepd (o/w -1.2 mboepd off-shore decline), on lower gas production in both Croatia and Hungary

October production:
- Back to normal after annual turnarounds; strong uptime at Catcher

* Associated companies include Baitex (Russia) and Pearl (KRI); Q3 2018 production of Baitex was 5.6 mboepd, Pearl 2.4 mboepd
VERY COMPETITIVE AND STABLE UNIT OPEX

**UNIT OPEX (USD/boe)**

- Q1-Q3 2018: 6.1

**FULLY CONSOLIDATED SUBS.**

- Q1-Q3 2017: 6.5
- Q1-Q3 2018: 6.7

**CAPEX (USD mn)**

- Other: 29 44 147 142
- M&A: 0 0 0 0
- Development: 0 0 0 0
- Exploration: 25 25 25 25

- Q1-Q3 2017: 200 147 29
- Q1-Q3 2018: 211 142 44

**COMMENTS**

- Group-level unit opex (direct production cost), including JVs and associates stabilized at a low level of USD 6.1/boe in Q3.

- Unit opex declined YoY from an unusually high base, which was hit by lower production, one-off issues.

- In 1-3Q 2018 group-level unit opex (direct production cost), including JVs and associates was only marginally higher at USD 6.1/boe. The small increase vs. 2017 was entirely FX rates driven.

- Organic capex was 5% higher YoY at USD 211mn.

- Exploration spending increased from a low base due to more activity in Norway, Hungary and Croatia.

- USD 17mn was spent in Q1-Q3 2018 on equity consolidated operations (Baitugan, FED, Pearl, accounted for among „JVs and associates”)

**MOLGROUP | 29**
UPSTREAM & DOWNSTREAM EBITDA CHANGES

UPSTREAM EBITDA YoY (USD mn)

Key drivers in Q3 2018 YoY
- Sharply higher Brent oil price (+45% YoY) and much stronger realized gas prices (+29% YoY)
- Positive volume impact driven by the inclusion of high-margin Catcher (UK) barrels
- Slightly lower lifting costs, as base was inflated by one-offs
- Others include production bonus payment in KRI in Q3 2018

DOWNSTREAM EBITDA QoQ (USD mn)

Key drivers in Q3 2018 QoQ
- Higher seasonal volumes in R&M
- Deteriorating price/margin (mainly a function of rising energy prices in line with higher oil and gas prices)
UPSTREAM: OPERATIONAL UPDATE (1)

Hungary

- The intensive drilling program continued in Q3 with progress on 4 wells on track. Acceleration of first oils is ongoing. Production of Gomba-D-2 well (drilled in Q2) already started at 0.2 mboepd.
- Successful production optimization (PO) program is ongoing. 22 well workovers were completed in Q3 and 1 well was fracked. Incremental production of the 2018 PO wells is 3.5 mboepd.
- Two concession bids have been submitted in the 6th bid round

Croatia

- The material, 13% decline in production YoY was driven by the sharp natural decline of onshore and offshore gas fields
- Within the frame of production optimization, 24 well workovers were completed in Q3
- Drava-02 exploration program in progress: Severovci-1 well was drilled in Q1 and is being prepared for fracking in Q4 2018; Mala Jasenovača-1 well abandonment is being prepared
- Major maintenance on facilities at GTP Molve, FF Ivanić Grad and onshore gas fields in Northern Croatia took place in September affecting production

United Kingdom

- UK production increased 18% QoQ and jumped more than three-fold YoY to 15.2 mboepd in Q3 2018 due to the rising contribution of Catcher (10.3mboepd in Q3)
- Catcher (MOL 20% WI, non-operated): The Catcher FPSO is working towards final acceptance. Phase-II Burgman drilling was completed. Operating efficiency reached 86% in Q3.
- Scott: oil pump issues continued to affect production in Q3; J43 (latest infill well) production is above expectation
- Scolty & Crathes (MOL 50% WI, non-operated): pipeline replacement project is in progress

Norway

- MOL Norge current licence portfolio consists of 18 licenses, of which 8 are operated. The Company has 3 committed operated exploration wells to be drilled, the first one in Q4 2018 (PL860), the second in Q2 2019 (PL539) and the third one in Q3 2019 (PL820S). MOL has also committed to two non-operated wells in Q2 2019 (PL019C) and in Q3 2019 (PL814).
- MOL Norge submitted its application in APA 2018 Licensing Round for two areas
UPSTREAM: OPERATIONAL UPDATE (2)

Pakistan

- Production (net to MOL) was at 8.2 mboepd in Q3, 4% lower QoQ and 5% down YoY. TAL block gross production was 85 kboepd in Q3 2018 (MOL 8.421%, Dev. WI; 10.5% Expl. WI, operated).
- Exploration activities continued in TAL, Margala, Karak and DG Khan blocks. The Mamikhel Deep-1 well proved to be dry, Mamikhel South well site construction is in progress. Licence for TAL Upside Exploration was extended until December 2019.
- The Mardankhel-2 well was tied-in in September 2018 with gross production of ~3,600 boepd. The Makori Deep-2 well location has been approved.

Kurdistan Region of Iraq

- Shaikan production was 3.3 mboepd in Q3 2018, 1% lower QoQ and 9% below Q3 2017. Payments have been received on a regular basis throughout the year in line with the PSC and on the basis of a lifting agreement that was entered into in January 2018.
- Early gains have been achieved with respect to infield debottlenecking and the construction of a 400m spur pipeline which now connects Production Facility 2 with the Atrush export line. This pipeline connection reduces commercial risk, trucking requirements for a significant share of production and HSE risk.
- MOL and GKP continued to work on a revised Field Development Plan (FDP) and a draft FDP was submitted to MNR.
- Pearl production was 2.4 mboepd in Q3, flat QoQ and 4% higher YoY. A Gas Sales Agreement has been signed by the Operator and the KRG for an additional 80 MMscfpd allowing revenue generation on gas sales.

Russia

- In Q3 2018, production at Baitugan field was 5.6 mboepd (MOL 51% WI, operated), down 2% QoQ and 10% lower than a year ago.
- Drilling program is in progress – 19 wells were drilled, of which 6 wells were drilled and completed in Q3.

Oman

- MOL and its JV partner Hydrocarbon Finder have identified the drilling target for the third exploration well in Block 66. The planned spud date is in Q1 2019.

Kazakhstan

- 2019-2020 work program and budget were reviewed with the partners. Final approval expected in December.

**COMMENTS**

- **EBITDA shrank by over 40% YoY in Q3 2018** and was affected by:
  - Lower domestic transmission volumes (-22% YoY), and lower non-regulated Serbian and Bosnian transit volumes (-19% YoY)
  - Lower demand for short term and annual capacity products resulting in significantly lower operating revenues
  - Higher operating costs in Q3 2018 as gas consumption costs increased due to sharply higher natural gas prices
